CMA Workforce Survey 2017

The Canadian Medical Association (CMA) would like your help. In order to better serve Canadians and Canadian communities, we would like to gather information about your practice. From your working hours and productivity to your use of technology and plans for the future — the survey details your practice in a way that isn’t available from government sources. We appreciate the importance of your time. Please know that every response will be treated as anonymous, with no personal identifiers collected. We respect the confidentiality of the information you provide.

Purpose

The results of this survey will be used to inform evidence-based policy. The information will help inform the Canadian Health Policy, the Health Workforce Plan and the Health Care Human Resources Strategic Plan.

Funding

The survey has been funded by the Canadian Health Services Research Foundation.

Comments

The comments entered for the survey have been approved by the University of Toronto Research Ethics Board.
